VALSPAR WEATHER XL
40 YEAR LIMITED WARRANTY

What truly sets us apart is our Rollformer, which transforms Grade A 29 Gauge steel sourced from domestic mills into our renowned "Tuff Rib" panels, perfect for both roofing and siding. With us, you can count on quality and efficiency every step of the way!

Hayley Paint Colors

Factory Milled Pigments

All our acrylic paints feature factory-milled pigments, rather than paint store colorants other paint suppliers rely on. Our process ensures our paint meets a higher standard of precision and color durability you won't find from other paint manufacturers.

RELIABLE RESULTS

Featuring a durable finish that's resistant to fading, cracking, blistering, or chalking, this paint adds a premium, professional finish to any outdoor surface. In addition, our Hayley Paint offers excellent flow and leveling over the grain texture of all wood substrates.

GUARANTEED PERFORMANCE

Featuring a durable finish that's resistant to fading, cracking, blistering, or chalking, this paint adds a premium, professional finish to any outdoor surface. In addition, our Hayley Paint offers excellent flow and leveling over the grain texture of all wood substrates.

ULTRA™ VINYL SIDING

Featuring a soft woodgrain texture and .040" thick panels, ProVia's Ultra vinyl lap siding utilizes our Super Polymer Formulation, which offers excellent weather resistance, impact resistance, and color retention. Plus, it's backed by a Lifetime Limited Warranty, making it an excellent choice for siding.

PREMIUM PERFORMANCE

Oakridge® laminated shingles provide premium protection and impressive curb appeal. A full double layer in the nailing zone gives Oakridge® Shingles greater integrity and better holding power compared to shingles with single layer wide nail zones.

On Site Builds

Preparing for Your Shed Installation

Have a fenced-in yard, trees, or landscaping that make it difficult to access the spot where you want your barn placed? No problem — we offer convenient on-site construction services.

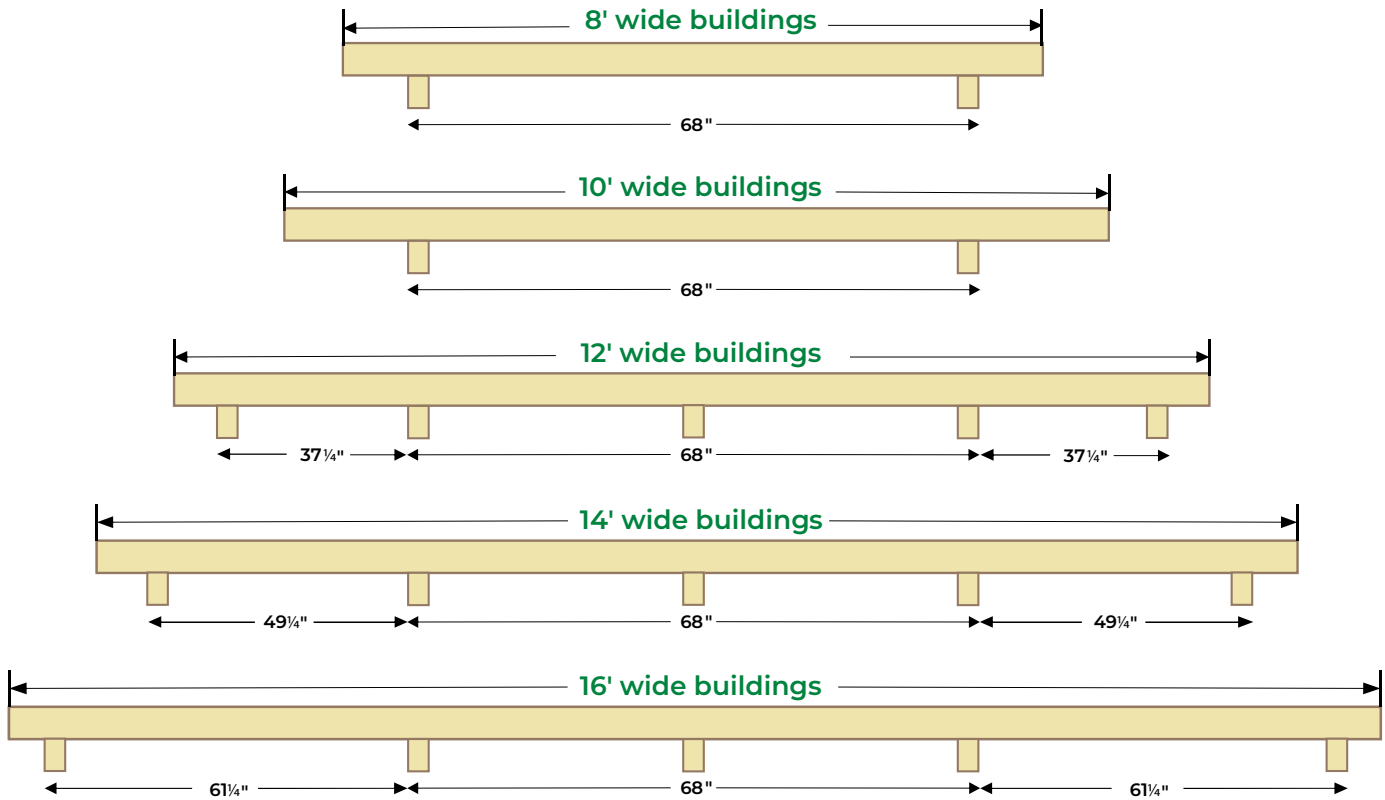

Our crew will bring all materials directly to your property on our trailer, park in the driveway or as close to the build site as possible, and carry the materials to the installation area by hand. This allows us to build your barn exactly where you want it while helping minimize damage to your lawn and keeping heavy equipment off your yard.

All we require is access to a power source at the build location.

On-site builds are available with a 25% upcharge.

WE OFFER FREE SITE INSPECTIONS AND COLOR MATCHES

Skid Spacing Measurements

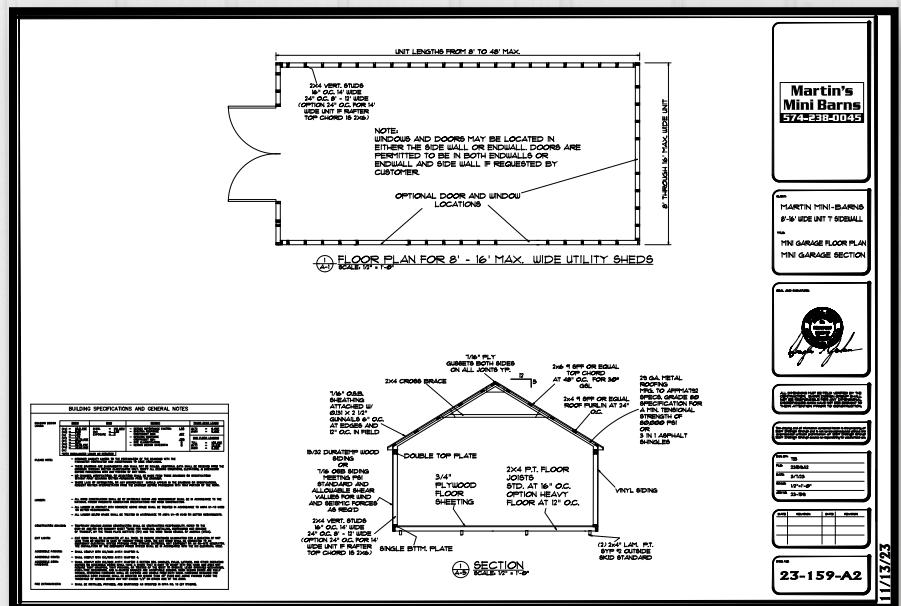

**Building dimensions do not calculate interior floor plan.
It is the homeowners responsibility to check with the local building department
and get any required permits if needed.**

State of Indiana/ State of Michigan

Engineer Stamped

Certified drawings

- 50 PSF ground snow load
- 115 MPH wind gusts

The Mule is a compact, hydraulically driven machine equipped with turf tires that won't damage grass, making installation quick and easy.

**FREE
DELIVERY**

Up to 40 miles from dealer lot

Delivery Checklist

1. Check fences, posts and trees to ensure adequate turning room.
2. Check overhead wires, trees, branches and underground septic systems, soft ground, etc.
3. Please have a level sight prepared PRIOR to our arrival. We recommend stone or concrete slabs, depending on barn size.
4. If you want blocks put under the object, we suggest 8" x 16" x 2" patio blocks, we will put blocks in place after object is set (we do not furnish blocks).
5. If we are going over the neighboring property, make sure you have permission to do so prior to delivery. Remember that you

(owner of object) are taking responsibility for the property that is being crossed. On delivery we will not be responsible for any damages done on property or lawn. Customer is responsible for all permits, code restraints and ordinances.

6. We recommend 3-4 inches of crushed stone or concrete slabs. We are not responsible if your shed shifts and none of these are used.
